

Curvo Spend Control

One platform to pinpoint *value-driving* initiatives.

\$50M+
in average annual savings across Curvo customers

Gain visibility, control and speed as you solve even the most complex sourcing challenges. Spend Control aggregates and synthesizes analysis of your medical device spend to create a customized roadmap to success. What took months, now takes weeks — and with curated insights to keep you informed about pricing, usage and categories, you'll know where to prioritize your efforts.

Backed by deep healthcare expertise and powered by AI, Spend Control provides unbiased insights from trusted data that drives value with healthcare procurement teams and clinicians.

All-inclusive analytics fed by accurate, timely data

Proactive monitoring to prevent savings erosion

AI-powered for speed and efficiency

Automated functions, including opportunity identification

Dynamic views and reports to expand spend visibility

Independent insights that earn clinician trust

“ Curvo helped us reduce the number of spine implant suppliers down to two. We saved a tremendous amount of money, and the physicians were engaged and involved. ”

Strategic Sourcing Director

Features of Spend Control

Expansive Benchmark Panel

Leverage a rich data panel with special focus on clinical product data. GPO-agnostic benchmarks are informed by 2500+ facilities, \$110B total clinical spend, and 2.3M clinical products.

Customizable Category Analytics

Use Curvo's proprietary Generic Implant Classification (GIC[®]) system to gain insights into implant and commodity spend across vendors, categories and product lines to support comparisons across multiple categories.

Dynamic Spend Monitoring

Track progress through configurable spend views to proactively identify issues such as price parity, price creep, and changes in utilization.

Savings Management

Track cost savings and share progress internally to align the organization and adapt to market conditions rather than relying solely on contract calendars.

Project Management

Aggregate and synthesize analysis of your clinical spend to identify and prioritize savings initiatives, memorialize work, and automate and document workflow processes.

RFP & Bid Management

Automate the distribution of RFPs, aggregate supplier responses, and conduct automated bid modeling for faster supplier engagement and the identification of cross-reference opportunities.
